BSc Computer Science

Year 3 Modules:

- Natural Language Processing
- AI and Games
- Graphics and Virtual Environments
- Advanced Distributed Systems

Final Year Project (40 credits):

- **Network Visualiser** – an interactive tool for exploring and analysing graph/network-structured data

### The Elms Academy

2022 – 2024

A levels

Subjects:

- Mathematics – A\*
- Further Maths – A\*
- Physics – A
- EPQ – A

Skills:

- Python
- Java
- React
- PHP
- HTML / CSS
- Javascript
- Photoshop
- Git

## Projects

### Personal Portfolio – [akramawel.com](http://akramawel.com)

2025 – Present

- Interactive, game-styled portfolio built in **React**, replacing a traditional scrolling page with an explorable overworld featuring **4+ interactive hotspots** (mail, phone, CV kiosk, project selector) and a scripted **dialogue/interaction engine**
- Custom **ResizeObserver**-driven auto-scale engine keeps a fixed-resolution game canvas pixel-crisp across any viewport, with no fixed breakpoints
- In-world interactions drive real functionality: CV download, contact details and direct links to **3 other projects**, all triggered through gameplay
- LinkedIn launch post for the site alone drove **144+ link engagements**

### Manchester Intelligence Society – Official Website & Blog

2025 – Present

- Designed and built the official website (**React**) and blog (**Astro** + **Sanity** CMS) for the North West's **first** university-level intelligence society
- Platform serves a society of **70+ active members** across **8+ academic disciplines**, supporting **13 events** delivered in the 2025/26 academic year
- Society has grown to **260+ Instagram** and **200+ LinkedIn** followers since founding

### Lets Go Gambling

2025

- **Team Project**, creating a satirical gambling website, getting **71 unique accounts** to join
- Implementation using **React Framework** and **Firebase** services with **Google authentication**

### Magnus Archives Map

2024

- Interactive web map tracking **locations and narrative connections** across horror podcast episodes
- Implementation using **Leaflet.js** with **client-side data management**
- Features include **episode search** and **character relationship visualization**

## Achievements / Extracurricular

### Web Dev Lead – Manchester Intelligence Society

2026 - Present

- Leading development of the society's **website and blog** (React, Astro + Sanity)

### Graphics Lead

2025 - 2026

- **Lead member** of the **graphics team** for the **computer science society** for University Of Manchester (**UniCs**)

### Hackathon

2025

- Came **Third Place** in the 2025 **Student Hack** against **100 other attendees**

### Best Design

2025

- Voted and won "**The Application with the Most Impressive Design and Implementation**" for the first year team project between all of CS and CS + Maths
